DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. The methods according to claims 1-12. The claims are drawn to a method of treatment that is classifiable in class 514.
- II. The compounds according to claim 13 of formula IV. These compounds are classifiable in class 544, subclass various.
- III. The toothpaste compositions according to claims 22-24. These compositions are classifiable in class 424, subclass 49+.
- IV. The mouthwash compositions according to claims 25-27. These compositions are classifiable in class 424, subclass various.
- V. The food compositions according to claims 28-33. These compositions are classifiable in class 426, subclass various.

The inventions of Groups I-V are separate and patentably distinct because there is no patentable co-action among them and a reference anticipating one member will not render another obvious.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter and different classification, a search of the five groups designated above would impose an undue burden upon the examiner, and restriction for examination purposes as indicated is proper.

Art Unit: 1623

A telephone call was made to Ellen Plotkin on November 9, 2004, to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is requested to elect a specifically disclosed species of the invention to be examined for search purposes.
